SILK is here!

Semantic Web Rules with Defaults, Higher-Order, and Scalability

Catch the presentations by Benjamin Grosof, Vulcan Inc.:
RR-2009 keynote talk Mon. 10/26 9-10:30am;
ISWC-2009 demo/poster Tues. 10/27 7:15-9:15pm;
ISWC-2009 tutorial on semantic rules Mon. 10/26 2-6pm

• A knowledge representation (KR) system: reasoner, language, UI, interchange.
• A new, highly ambitious effort by Vulcan Inc., which also develops Semantic MediaWiki+ and venture invests in semantic technology. Multi-institutional.
• Addresses fundamental requirements for scaling Semantic Web to widely-authored Very Large KBs in business and science that answer questions, proactively supply info, and reason powerfully.
• Radically extends the KR power of W3C OWL, SPARQL, and RIF — and of SQL
  • Defaults and robust conflict handling — cope with knowledge quality and context
  • Higher-order and flexible meta-reasoning — elevate meta-data to meta-knowledge
  • Actions and events, cf. production rules and process models — activate knowledge
• Use cases in business policies, ontology mapping, e-commerce, biomed.
• Redefining the KR playing field for semantic web, business rules, and rule-based process management.
• How You can be Involved:
  • Try the software, or review the language design — email us
